

HOW TO PLANT GUIDE

Plant your own dream yard today.

1. Pick a Spot

Pick a spot that gets an adequate amount of sun, and will meet the size requirements of your tree once it has matured.

2. Dig The Hole

Use a pick to loosen the soil, and a shovel to move the soil onto a tarp. The hole should be 10% larger than the width of the container of your tree.

3. Condition Soil

Sprinkle a generous amount of Landscape Soil Conditioner™ into the hole. Follow the directions on the bag corresponding to the size of your tree.

4. Place Your Tree

Carefully remove the tree from the container, and place the rootball of the tree into the hole. Make sure the top of the root ball is slightly above the top of the soil.

5. Backfill

Using the soil you moved, pack the hole neatly and tightly. Make sure to tamp out any air pockets.

6. Build A Well

Build a small well around the tree, filling the top layer with Premium Planting Mulch™.

7. Water & Fertilize

Water tree thoroughly and fertilize using Super-Charged Moon Juice™.

8. Check Soil

Keep soil moist, not soggy. Over the next days, check soil in between waterings to ensure proper moisture.

Equipment Needed

- | | | | |
|--|---------------------------------------|--------------------------------------|---|
| ☐ Shovel | ☐ Pliers | ☐ Water Hose | ☐ Multi-Purpose Wire |
| ☐ Moon Juice™ | ☐ Gloves | ☐ Tree Tape | ☐ Pickaxe |
| ☐ Premium Planting Mulch™ | ☐ Post Pounder | ☐ Lodge Poles | ☐ Trunk Wrap |
| ☐ Landscape Soil Conditioner™ | | | |
